"Quality From Seed to Shelves"

Our Story

Founded by İbrahim Değirmenci in 2003 on 2,460 square meters of enclosed space in the Mersin Yeni Hal Complex, Değirmenciler grew rapidly through the export of fruits, most of which were produced in-house. In 2010, the company moved to its modern facility built along the Mersin-Tarsus road, where it continues its operations.

About Us

With many years of experience in the industry, our company is continuously growing and evolving. Our modern facility, established on 23 acres of land, includes an administrative building, a packaging facility with a capacity to package 20 tons of products per hour, and 12 cold storage/ripening rooms. We prioritize quality at every stage of our production process. The fruits from our orchards are meticulously tracked and delivered to our facilities. Here, they are packaged in a variety of sizes, ranging from 500 grams to 360 kilograms, and prepared to be delivered to end consumers with a focus on customer satisfaction. Thanks to these high standards and our meticulous work ethic, we successfully export our products to many countries. Değirmenciler offers the best range of Turkish agricultural products and establishes a direct link between the customer and agriculture. By providing high-quality certified products, we always ensure competitive prices.

Quality

At Değirmencil, we are committed to increasing the satisfaction of our broad customer base, maintaining the highest level of service quality, and ensuring the continuity of our growth. In line with these goals, we have adopted the following key policies under our Quality and Food Safety Management System:

- Implementing and continuously improving the requirements of the quality management system and the food safety management system, with the participation of all our employees, to offer products in line with quality and food safety principles.
- Conducting our activities in compliance with legal requirements.
- Viewing our suppliers as an integral part of our system and business partners.
- Ensuring the safety and quality of products at every stage of the supply chain, with a focus on human health.
- Requesting and sharing information related to food safety throughout the food chain.
- Continuously improving all our processes to meet and exceed customer needs and expectations.
- Keeping up with and applying technological developments.
- Supporting a food safety culture and producing suitable, high-quality products.
- Preserving the unique characteristics of our products from raw material to the final product.
- Ensuring sustainable production processes and fulfilling the conditions necessary for sustainability.

At Değirmencil, we aim to continuously increase customer satisfaction, maintain the highest level of service quality, and ensure the continuity of our growth. To achieve this, we meticulously fulfill all the requirements of our GLOBAL GAP, ITU, GRASP, IFS, and SMETA certifications within the framework of our quality approach.

Our Facility And Orchards

We have many citrus and stone fruit orchards, we also supply other fresh fruits grown in the region from the best producers. We store these products in our state-of-the-art cold storages in suitable air-conditioning conditions. And we pack the products without sacrificing quality. We use renewable energy systems in our facilities and provide environmentally friendly energy consumption.
